EDUCATION

Jamia Millia Islamia

Bachelor of Technology in Computer Engineering

Cumulative Grade Point Average: 8.68

New Delhi ,India

May 2025

WORK EXPERIENCE

HSBC

Software Engineer

Pune

Jul 2025 – Present

- **Developing** and maintaining backend microservices using **Java, Spring Boot** and internal frameworks.
- **Implemented** a user-**whitelisting** mechanism to enable controlled feature access for selected users.
- **Developed** automated reporting functionality to share operational reports with business stakeholders.
- **Contributing** to DevOps activities for microservices deployment using **Kubernetes and GCP**.
- **Resolved SAST (Static Application Security Testing)** issues to strengthen code security and maintain compliance.
- **Collaborating** with cross-functional teams to enhance service performance and ensure seamless system integration.

Nikah Forever

Software Engineer Intern

New Delhi

Dec 2024 – Mar 2025

- **Migrated 500,000 images to DigitalOcean** Storage, optimizing data storage and reducing server load.
- **Redesigned backend architecture** to serve images efficiently from DigitalOcean, improving performance.
- **Implemented Master-Slave database architecture** to enhance scalability and ensure high availability.
- **Setting up automated backup with zero downtime**, ensuring continuous data integrity and disaster recovery.

Stealth Startup

Software Engineer Intern

Malviya Nagar,Saket

Jun 2024 – Jul 2024

- **Engineered** web applications using Next.js and TypeScript, enhancing user experience through improved performance and **optimized functionality**.
- **Developed** robust and scalable backend services with Nodejs, ensuring seamless integration and performance.
- **Utilized Docker and Docker Compose** for application containerization, and set up **CI/CD** pipelines using **GitHub Actions**, streamlining the **deployment** process.
- **Managed** horizontal load balancing by running multiple **VMs**, and **explored** cloud platforms such as **AWS, Azure, and Google Cloud** to optimize infrastructure costs by 20%.

PROJECTS

Learning Management System (ED Tech)

Aug 2023- Oct 2023

- **Developed** a user authentication system with **registration, login, and password recovery** for secure access.
- **Integrated** a payment gateway to **facilitate** course purchases with a **seamless and secure** transaction process.
- **Created** an **admin panel** for **course management**, enabling easy addition, editing, and removal of courses.
- **Implemented** content management for **updating course materials** to keep content current and engaging.

MindCare With Ai

Nov 2024- Feb 2025

- **Collected and preprocessed** mental health conversational data using **tokenization** and **embedding** technique.
- **Developed** an AI chatbot with **LLaMA 2**, providing empathetic responses and detecting distress through **NLP**.
- **Built** machine learning models (**BiLSTM, RNN**) to predict suicidal tendencies with high accuracy.
- **Implemented** a risk escalation system triggering **real-time alerts** via WhatsApp, SMS, and email to **healthcare professionals**.
- **Deployed** the platform on Microsoft Azure with a **counselor dashboard** for monitoring high-risk cases and ensuring timely intervention.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, C, C++

Frameworks: React.js, Next.js, Node.js, Express.js, Springboot

Databases: MongoDB, SQL

Cloud Platforms: AWS, Azure, Google Cloud

Tools & APIs: Docker, Docker Compose, GitHub Actions, Git, GitHub.
